SUMMARY

- An Information Technology graduate with a year of experience in front-end web development.
- Strong implementation experience in Front-end Web Development with the hands-on knowledge in programming like (HTML, CSS, JavaScript and React).
- Solid working experience on different modules of front-end web applications and customizations.
- Proposed change functionality for better impact assessment by the change approvers and change governance board & historic report ability.
- Good experience in handling day to day support activities in web development like data loading, user administration, system administration and bug fixes and implementation on new enhancement as per the client needs.
- Changed management, workflow customization to accommodate the various compliance requirements.
- Migrated the update sets to production and handle release management activities.
- Experienced in working as Intern in Web-Development.

EXPERIENCE

1) Hub Group – Associate Full Stack Developer (Feb 2024 – Jun 2024)

- Developed and maintained Angular components for building responsive interactive user interface.
- Created an additional function in the tender management changes tab which will be enabled only if the appointment date or time is changed from the actual time when the order is created and that is used to create an accessorial according to the charge code it is selected.
- Debugged backend issues and monitored MongoDB Atlas for database management.
- Managed and analyzed database structures and performance using MongoDB Compass.
- Conducted regression testing to ensure that existing functionality remained intact after updates and changes.

2) The Reciprocal Solutions – Front Developer Intern (June 2023 – Dec 2023)

- Developed and maintained React components for building responsive and interactive user interfaces.
- Utilized Reacts state management to create dynamic and data-driven components.
- Worked with stateful and stateless components based on application requirements.
- Ensured consistency in UI elements and layouts across the application.
- Utilized props to pass data and behaviors between components.
- Designed and implemented reusable React components to optimize code maintainability

and development efficiency.

- Used asynchronous programming techniques, such as promises and async/await, for handling API calls.
- Implemented client-side routing using React Router for creating a seamless and navigable user experience.
- Developed forms using controlled components and managed form state in React.
- Implemented form validation and handled form submissions.
- Collaborated with design teams to adapt layouts for Web Applications.
- Identified and resolved frontend bugs and issues through debugging techniques.
- Used version control system such as Git for code collaboration and tracking changes.
- Actively engaged in learning new ReactJS features, best practices, and industry trends.
- Worked in projects (Lead Management System, 5k Analytics).

EDUCATION DETAILS

COURSE	INSTITUTION	YEAR OF PASSING	PERCENTAGE
B.Tech Information Technology	SNS College of Engineering	2023	81%
12th grade	Holy Cross Matriculation Higher Secondary School	2019	64%
10th grade	Holy Cross Matriculation Higher Secondary School	2017	89%
